A Few General Smoothie Tips

- 1) Use Greek Style yogurt instead of regular for thicker/creamier smoothie
- 2) If you like a sweeter smoothie, use more banana or a few teaspoons of sugar. If you do too much sugar you will lose part of its health value and it can easily start to overtake the taste of the fruit!
- 3) Do NOT be afraid to experiment. The great thing about smoothies is you can mix and match, putting all your favorite ingredients in!
- 4) ½ Cup of fresh spinach goes great in any smoothie. The fruit will make it so you don't even taste the serving of healthy greens.
- 5) In place of milk - you can sub. soy milk, almond milk, coconut milk, water, or any juice – to provide the liquid to get the consistent smoothie texture you will LOVE!!
