**\*\*To use this chart:** The weeks before Christmas are shown across the top of the chart.

The dollar figure shown is the personal profit you can earn by holding just 2 demos per week.

Figure your own party average. **For example:** Based on holding two demos per week with a party average of \$400, if you held two \$400 demos each week for the next 12 weeks, you would earn approximately \$2,400 personal profit before Christmas!

(based on 25% profit per party).
